

CASTORIA

for Infants and Children.

Don't Poison Baby.

FORTY YEARS AGO almost every mother thought her child must have paregoric or laudanum to make it sleep. These drugs will produce sleep, and a few drops too many will produce the sleep from which there is no waking. Many are the children who have been killed or whose health has been ruined for life by paregoric, laudanum and morphine, each of which is a narcotic product of opium. Druggists are prohibited from selling either of the narcotics named to children at all, or to anybody, without labeling them "poison." The definition of "narcotic" is: "A medicine which relieves pain and produces sleep, but which in poisonous doses produces stupor, coma, convulsions and death." The taste and smell of medicines containing opium are disagreeable and sold under the names of "Drops," "Cordials," "Soothing Syrup," etc. You should not permit any medicine to be given to your children without the approval of your physician, know of what it is composed. Castoria does not contain narcotics.

The signature of *Dr. J. C. Fletcher* guarantees genuine Castoria. Physicians Recommend Castoria.

"I have frequently prescribed Castoria for constipation of children with good results." W. A. CHAMBERLAIN, M. D., Buffalo, N. Y.

"I find your Castoria is very beneficial in the treatment of children's ailments." F. DAVIS, M. D., Chicago, Ill.

"As the father of thirteen children I certainly know something about your great medicine and from my own family experience, I have, in the course of practice, found Castoria a popular and reliable remedy in almost every case." Wm. J. McCRACKEN, M. D., Omaha, Neb.

"I object to what are called patent medicines, where neither does know what is put in them, but I know the formula of your Castoria and advise its use in proper cases. I judge it to be a very safe, as well as harmless family medicine." N. B. SIZES, M. D., Brooklyn, N. Y.

REPORT SHOWS PROGRESS OF FIGHT ON ANIMAL TUBERCULOSIS

In his report filed yesterday Dr. Norgaard outlined the work that is being done to control animal tuberculosis in the territory.

Following is the section of Dr. Norgaard's report with reference to tuberculosis control work, containing his recommendation of a uniform county ordinance:

"According to instructions received from the president of this board, a letter was addressed to the deputy territorial veterinarians at Hilo, Kahului and Lihue, requesting them to take the necessary steps to ascertain in how far it would be advisable or feasible to extend the tuberculosis control work to the islands outside of Oahu, at the present time. The respective answers to these letters are herewith appended, and while there seems to be a certain desire to have all dairy animals tested for tuberculosis it appears to be a question whether so important a subject should be presented for action by the respective boards of supervisors at such a late time in their incumbency of office. To assume the responsibility for the promulgation of the ordinance requiring the testing of all dairy cattle and the destruction of all animals found to be affected with tuberculosis, by these various boards just before a majority of their members may be retiring from office can hardly be expected of them, and as some time will be required for the further education of both dairy owners and milk consumers to thoroughly understand the importance of this measure, it may be better not to force an issue at the present time, but rather to get prepared to present a uniform milk ordinance for the approval of the respective boards of supervisors as soon as possible after they have become established in office.

Honolulu Milk Tests.
"About twenty head of cattle have been tested during the month, most of them dairy animals being bought or sold or transferred from stable to stable, out of which number three animals have reacted; at the same time the assistant territorial veterinarian has given considerable time to the testing and examination of milk samples as collected by the municipal milk inspector. Dr. Case's report shows that while there is an improvement over the conditions reported on last month, there is still room for a considerable reduction in the number of micro-organisms found in most of the samples.

Dr. Case, in his report, gives results of twenty-five tests of milk and cream and calls special attention to these three cases, the examinations having been made after 72 hours incubation at 37 degrees C. O. T. F. Dairy, fresh from cooler, 217,330 bacteria per cc.; I. Nayaiki Dairy, eight hours old on ice, 1,322,000 bacteria per cc.

He says these samples "show counts far above what they should be, and from one dairy in particular which has shown improvement over last month. Advice and instructions have been given and the municipal milk inspector is keeping close and careful watch of this dairy along with several others and material improvement may soon be expected."

Greater Care Urged.
Referring to three samples from Waiwale Jersey herd and two from Waiwale Ranch herd, the assistant veterinarian says: "It is evident that greater care is used in the handling of milk from Mrs. Isenberg's Jersey herd than is used in the production of milk from the ranch herd. So marked a difference should not be as much care should be exercised in the production of milk from one dairy as another.

"There seems to be a disposition on the part of the Dairymen's Association to accept milk no matter what its condition and from those who have not even a permit to sell milk. This is no doubt due to the confidence they have in their purifying apparatus and its demonstrated ability to considerably lower the bacterial content of milk subjected to it in influence, but there is a higher principle involved. The position occupied by the Dairymen's Association in the system of milk supply of the city is such as enables it to exert a powerful influence toward the betterment of the product as it reaches them, and it should use this influence to encourage its many contributors to produce a clean product in a sanitary way."

Cattle Tests.
Dr. Case reports animals subjected to the intra-dermal test as follows: One cow owned by Mrs. Andrews, passed; twelve cows owned by Bernal Live Stock Co., ten passed and two condemned; five cows owned by A. Waterhouse, all passed; one cow owned by F. C. Atherton, condemned. The animals tested for the Bernal company came from the Gouverneur ranch, Kona, Hawaii, and Dr. Case states that out of 200 head of cattle arriving here from Kona ten have been condemned, and if this can be taken as a criterion would show 5 per cent of tuberculosis among the dairy animals in Kona. In this connection he says:

"By keeping careful watch over the dairies we have been able to eliminate ten centers of infection which have been imported directly from the island of Hawaii. Had these ten animals gone untested they would have rapidly spread the disease either directly or indirectly to every dairy on the island of Oahu, and the labor of years would have been lost and conditions would have rapidly reverted to what they were when systematic testing was first established.

"Dairy stock shipped from the other islands are purchased by dairymen here subject to the test, so the condemnation of these animals entails no loss to them as other animals are sent to take their places."

No chances are taken on these con-

demned animals from the other islands, all being forced to the slaughter houses. A history of the case of Mr. Atherton's cow is given, which traces the contagion back to Bellina's pasture at Niu, where condemned cows were sent to fatten for slaughter. Another cow owned by Mr. Atherton had been in this pasture and after its return was found on testing to be badly infected. The particular cow reported condemned had passed two tests, but on a third was found infected.

SOMETHING FOR MOTHERS.

This is the season of the year when mothers feel very much concerned over the frequent colds contracted by their children, and have abundant reason for it, as every cold weakens the lungs, lowers the vitality and paves the way for the more serious diseases that so often follow. Chamberlain's Cough Remedy is famous for its cures, and is pleasant and safe to take. For sale by all dealers. Benson, Smith & Co., Ltd., agents for Hawaii.

CHINESE PLEADS GUILTY TO SERIOUS CHARGES.

Wong Hin Cho, a Chinese newspaper publisher, accused of sending unmailable matter to the postoffice for mailing, this morning changed his plea of not guilty before U. S. District Judge Clemons, and was sentenced to ten days' imprisonment with a fine of \$300 and costs.

The federal grand jury, called for tomorrow morning, has again been excused until called. The only case set for hearing tomorrow, that of Chow Hoy, a Chinaman accused of perjury before the federal grand jury, has been continued until called. The defendant appeared in court this morning with his attorney, who explained that Chow Hoy was the victim of quick consumption and might not be able to attend the trial. At his request the continuance was granted.

Girls

Read About These Three Girls. How Sick They Were and How Their Health Was Restored by Lydia E. Pinkham's Vegetable Compound.

Appleton, Wis.—"I take pleasure in writing you an account of my sickness. I told a friend of mine how I felt and she said I had female trouble and advised me to use Lydia E. Pinkham's Vegetable Compound, as she had taken it herself for the same trouble with wonderful results. I had been sick for two years and overworked myself, and had such bad feelings every month that I could hardly walk for pain. I was very nervous and easily tired out and could not sleep nights. I had dizzy spells, and pimples came on my face. But I have taken your Lydia E. Pinkham's Vegetable Compound and it has restored my health. I think it is the best medicine in existence."

Miss Cecelia M. Bauer, 1101 Lawrence St., Appleton, Wis.

A SCHOOL TEACHER'S GRATITUDE:

Geneva, Iowa.—"I have been teaching school for some years and I have neglected my health because I was too busy with my work to attend to myself properly. I suffered greatly every month and was on the verge of a nervous breakdown. I wrote to you about my condition and took Lydia E. Pinkham's Vegetable Compound and the Blood Purifier as you recommended. These remedies have done wonders for me and I can highly and widely recommend them to every suffering woman."

Miss Ella McCandless, Montrose, Col.

A COLORADO GIRL'S CASE:

Montrose, Col.—"I was troubled very much with irregular periods. Sometimes two months would elapse. I suffered severe headache, was weak and nervous, could eat scarcely anything. I took both Lydia E. Pinkham's Vegetable Compound and Blood Purifier and the result was wonderful. I feel like another person."

"I think your remedies are the best on earth and cannot express my thankfulness to you for what they have done to me. I help my neighbors when they are sick, and I shall always recommend your medicines."

Miss Ella McCandless, Montrose, Col.

Is it not reasonable to suppose that a medicine that did so much for these girls will benefit any other girl who is suffering with the same troubles?

Does it not seem the only sensible thing to give such a medicine at least a trial? You may be sure that it can do you no harm, and there are lots of proof that it will do you much good.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No one sick with woman's ailments does justice to herself who will not try this famous medicine, made from roots and herbs, it has restored so many suffering women to health. Write to LYDIA E. PINKHAM MEDICINE CO. (CONFIDENTIAL) LYNN, MASS., for advice. Your letter will be opened, read and answered by a woman and held in strict confidence.

LYDIA E. PINKHAM

Leonard Cleanable One-Door Porcelain Lined Refrigerator

You never thought of tracing that last spell of sickness to your refrigerator, did you? And yet it is quite possible that the blame should be placed right there. Suppose you go right now and examine your refrigerator.

Just a small inside of it. Come throw off a gas while digesting the grease which you have wiped into the scratches in the white enamel, into holes made for shelf supports and other cracks and crevices, or left on the uncleanable galvanized iron, and this gas is that horrible smell; but the product of their digestion is a deadly poison. Then think of the

Leonard Cleanable Refrigerator

Think of the smooth, white porcelain lining, all in one solid piece, so easy to clean. Not a crack, hole or crevice for germs to hide. Then, tomorrow, as soon as you can get down, come and SEE and order a Leonard Cleanable—the finest refrigerator made.
